

# Christmas Season

**December** is the time of year when my family is getting ready for **Christmas**.

There are different things in my house during December. I can see a Christmas Tree, some wrapped presents and my family are talking about who we will see on Christmas Day.

I can see wrapped presents in my house and under my tree.

Some of the presents have my name of them. I can look at them but I can't unwrap them until Christmas Day.

I can feel excited and happy at Christmas time. I can also feel frustrated when I need to wait a long time to open my presents.

If I am feeling frustrated or angry, I can tell my family and together we can do some other things before Christmas day.

I can colour in a Christmas tree or make some Christmas wrapping paper using blank paper and pencils.

Christmas is a fun time of the year. I am excited about giving my family a present and I am excited about getting some presents.

I can feel excited at Christmas time, I can also feel frustrated.

My Christmas Visual can help me understand more about when the exciting things will happen in December.
